Phase 2c: Joint Workshops on Inundation Mapping and Evacuation Planning

Rick Bailey

Head of Secretariat

UNESCO-IOC Intergovernmental Coordination Group

Indian Ocean Tsunami Warning & Mitigation System

(ICG/IOTWMS)

r.bailey@unesco.org

Launch of Project Phase 2c:

“Strengthening tsunami early warning in the North-West Indian Ocean region through regional cooperation”

Wednesday, 15 November 2023

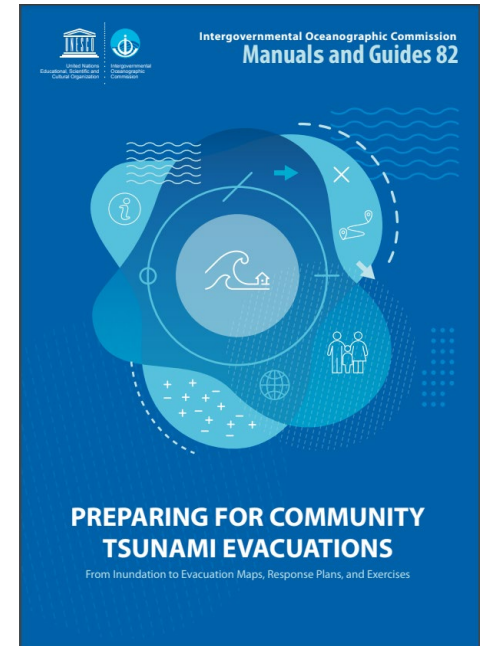

Objectives of the workshops

unesco

Intergovernmental
Oceanographic
Commission

1. **Provide background information on outcomes from Phases 1, 2a and 2b** of the project and related initiatives, such as the UN Ocean Decade Tsunami Programme and the UNESCO-IOC Tsunami Ready Recognition Programme (TRRP)
2. **Getting to know each other** and further develop regional and national partnership arrangements utilising the **Regional Working Group on Tsunami Inundation Modelling & Mapping (RWG-TIMM)** and **National Working Groups on Tsunami Evacuation Planning (NWG-TEPs)**
3. Discussion and **further sharing of knowledge on principal concepts and approaches** for tsunami inundation mapping and evacuation planning in order to build a common understanding among the participants
4. **Review existing tsunami inundation maps for Pilot Areas**
5. **Develop plans to develop new inundation maps for Pilot Areas** utilising approach developed by RWG-TIMM
6. **Site visit to a community with existing tsunami evacuation maps**
7. **Training in tsunami evacuation mapping for Pilot Areas** using existing global approaches, standards, methodologies and best practices guide developed for NWIO in Phase 2b (and translated to Farsi)
8. **Outlook on further activities** to be undertaken under the framework of the project and agreements on next steps.

To also be translated into
Farsi and Urdu in Phase 2c)

Overall schedule of the workshops

3rd – 7th March 2024, kindly hosted by Oman

unesco

Oceanographic
Commission

Saturday	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday
Inundation Mapping Workshop participants arrive	Inundation Mapping Workshop	Inundation Mapping Workshop	Inundation Mapping Workshop	Inundation Mapping Workshop participants depart		
		Joint field trip	Joint workshop session			
	Evacuation Planning Workshop participants arrive	Evacuation Planning Workshop	Evacuation Planning Workshop	Evacuation Planning Workshop	Evacuation Planning Workshop	Evacuation Planning Workshop participants depart
			Joint Dinner			

Lead in inundation modelling meeting, joint with COASTWAVE Project of NE Atlantic & Mediterranean Seas TWS

Joint webinar on similar activities in Cyprus as part of the CoastWave Project. As part of a European project, inundation maps based on previously prepared PTHA in the eastern Mediterranean were developed and then used for evacuation planning with partners on Cyprus.

Scientists from the participating institutions, who have also supported development of the PTHA in the NWIO, will report on their latest strategies and results.

The experiences from the Cyprus project will provide valuable input to the work foreseen in the UNESCAP funded NWIO project.

The webinar is scheduled to take place on **November 28th at 9.00 AM UTC** and will last approximately 1.5 - 2 hours. A detailed program will be distributed later.
