	<b>Total 90 minutes</b>	<b>Coastal Cities and Communities Joining Tsunami Ready</b>	
		<p><b>Description</b></p> <p>In June 2021, IOC-UNESCO approved the Ocean Decade Tsunami Programme (ODTP<sup>[1]</sup>) in response to the call of action by the United Nations Decade of Ocean Science for Sustainable Development (2021-2030). The ODTP aims to significantly enhance the existing global tsunami warning system by reducing timeliness and the uncertainty of the tsunami warning, and increasing the readiness of coastal communities, with the ultimate goal of minimising the loss of lives. The first higher level objective of the ODTP is to develop the warning systems' capacity to endeavour sending out actionable warnings within 10 minutes for tsunamis from all sources with the least amount of uncertainty, to evacuate the largest possible amount of endangered people before impact. The second objective of the ODTP is to ensure 100 percent of communities at risk be prepared and resilient to tsunamis by 2030 through programmes like the IOC-UNESCO Tsunami Ready Recognition Programme (TRRP). For such a purpose, an International Tsunami Ready Coalition has been established, with the aim to "contribute to increasing the number of Tsunami Ready communities as part of the Ocean Decade" by raising the profile of UNESCO Tsunami Ready in collaboration with critical stakeholders across the UN system. Key objectives of the Ocean Conference satellite event:</p> <ul style="list-style-type: none"> <li>i. Promote partnerships, collaboration and understanding how to co-design actions to enhance the readiness of coastal communities to tsunamis in a multi-hazard context.</li> <li>ii. Showcase the benefits of UNESCO IOC TRRP.</li> <li>iii. Acknowledge new cities and communities recognized as TRRP</li> <li>iv. Call for new countries and communities to join TRRP.</li> </ul> <p><sup>[1]</sup> <a href="https://oceandecade.org/actions/the-ocean-decade-tsunami-programme/">https://oceandecade.org/actions/the-ocean-decade-tsunami-programme/</a></p> <p><i>Version Submitted (Conference Questionnaire)</i></p> <p>The IOC-UNESCO Ocean Decade Tsunami Programme (ODTP<sup>[1]</sup>) aims to significantly enhance the existing global tsunami warning system by reducing timeliness and the uncertainty of the tsunami warning and increasing the readiness of coastal communities through initiatives like the UNESCO-IOC Tsunami Ready Recognition Programme (TRRP).</p> <ul style="list-style-type: none"> <li>v.
